

SHE ALERT

LV Cable Flashover

Date of incident which is raised in days	30/07/2024		Directorate	SEPD Customer Operations	
Region	Thames Valley	Location	Bracknell	Classification	PTBW
What happened ?					
<p>Our operative was in the process of cutting an LV Consac core using an approved set of insulated ratchet cutters to obtain an isolation point for a low voltage fault to be repaired.</p> <p>Whilst carrying out this operation a flashover occurred, where the Consac sheath pierced the insulation of ratchet cutters.</p> <p>Staff are reminded to always follow live jointing working procedures, only one core should be exposed at any one time. Always shroud your neutral conductor.</p> <p>A full investigation is underway and learnings will be shared.</p>
