Programme Updates

What we are working on?

- An industry working group has been established
- 1st meeting May 7th
- Expected programme review completion August
- Proposed launch October

Network Control Level 4

- Variety of feedback that relates to the qualification, unit standards and learning and assessment resources
- Subgroup is reviewing the unit standards that make up the programme
- Programme development completed by August
- Proposed launch October

LMS Updates

Employer and CSAM View

LMS Employer View

Learner Progress

- Overview of all learners
- Drill down into individual learners
- View assessments (read only)

Connexis Commitment

INDEPENDENT WORK-BASED LEARNING MODEL

With the key features being.....

- Industry Skills Boards (ISBs) established as separate standards-setting entities
- **Polytechnics, PTEs, and Wānanga** will all be able to **offer work-based learning**
- **Industries will work with providers** to deliver work-based learning programmes for sectors currently supported by Te Pūkenga Work-based Learning divisions
- **The provider manages all aspects of work-based learning:** they enrol learners, provide pastoral care, and arrange education and assessment

From 1 January 2026:

- Workforce Development Functions – transition to new ISBs
- New ISBs will set training standards, endorse provider programmes and moderate assessments.
- ISBs will also have a workforce analysis function for their sectors, and provide investment advice to the Tertiary Education Commission (TEC).

WORK-BASED LEARNING DIVISIONS (WBL)

- **1 January 2026**, WBLs (Connexis) transfer to an ISB for up to two years
- WBL Divisions (Connexis) will be treated as **a separate division of the ISB** – not integrated
- WBL Divisions (Connexis) can continue to enrol learners until alternative providers are in place, **or by 30 June 2027**
- New work-based learning providers can start enrolling learners from 1 January 2026 subject to having met approval and funding requirements
- Once new work-based learning providers are established, ISBs can transition enrolled learners to that organisation, with approval
- **On 31 December 2027**, ISBs will cease managing training and all remaining enrolments must have transitioned

FUNDING OF ENTITIES

There are important additional details in how funding will flow

- **On 1 January 2026** the **staff, learners and assets** associated with the nine WBL divisions within Te Pūkenga, including Connexis **shift to ISBs**
- ISBs will be publicly funded for standard setting and may charge quality assurance fees to providers
- Providers receive tuition subsidies and charge enrolment fees
- ISBs will be able to receive tuition subsidies and charge enrolment fees for the period they are managing training (up until 31 December 2027 or earlier)

- All currently enrolled learners will **remain with Connexis**.
- Whilst there will be changes to the ownership of the WBL divisions (Connexis), **learners' programmes will continue to be delivered**
- People should **continue to enrol and complete apprenticeships** and other work-based training with existing providers
- **Over time**, as new providers are approved to deliver work-based learning, **employers and learners may see more choice** of where they can be supported through the training

Number and coverage of Industry Skills Boards

- Automotive industries
- Construction industries
- Infrastructure industries
- Food and fibre industries
- Service industries
- Manufacturing and technology industries
- Social and community industries.

Infrastructure Industries

- Electricity Supply
- Wind Farm
- Telecommunications
- Civil Engineering
- Surveying
- Road construction and traffic management
- Noted that Water is also tagged to Infrastructure

We want our communication to be on point. What do you want to know?
