

COURSE SCHEDULE 2026

The EEA Professional Development Course Calendar sets out a year-round schedule of training opportunities across the electricity supply industry.

Each course is shown with its planned delivery date to support early planning by learners and employers.

Early registration is encouraged to secure a place.

Registrations are taken on a first-come first-served basis, some courses have capped numbers and if demand is higher than expected, extra sessions may be added to ensure access while keeping class sizes manageable.

As new courses are developed, they will be added to the calendar.

Schedule 2026		Micro-Credential	Professional Certificate	Other
Q1	February	OLD-010 Line Design Principles		
	March	Line Design Mathematics	PSD-010 Power System Components for Electricity Supply	
Q2	April	OLD-050 Cross-arm Solutions		
	May	OLD-030 Insulator Solutions	PSD-040 Protection Systems for Electricity Supply	Safety in Design
	June	OLD-080 Line Design Practice		
Q3	July	Line Design Mathematics	PSD-030 Earthing Systems for Electricity Supply	
	August	OLD-010 Line Design Principles		Safety in Design
	September	OLD-020 Conductor Solutions	PSD-010 Power System Components for Electricity Supply	
Q4	October	Line Design Mathematics	PSD-060 High Voltage Plant for Heavy Industry	Safety in Design
	November	OLD-060 Stay Solutions
