Electricity Engineers'
Association

Solar Workshop

Tuesday, 22 September 2025 · 1.15pm – 4:30pm

NZICC, Auckland

Solar Workshop Agenda

1:15 – 1:25 | Welcome and Aligning on the Why

- Welcome and Workshop Objectives: EEA
- Aligning on the need for industry wide planning and coordination: SEANZ

1:25 – 1:50 | Background Session One: Customer perspective on the challenge and opportunity

- SEANZ Installer / Customer
- EECA presentation: data on consumer behaviour and expectations

1:50 – 2:15 | Background Session Two: Regulatory and market change

- Overview of relevant regulatory changes and upcoming work: Electricity Authority
- Market change: Current and future trends: SEANZ

2:15 – 2:40 | Background Session Three: Stocktake of work underway

- EEA: How this links to other EEA workstreams (DG Connections, ELAM/BELAM)
- EECA: Linkage with current EECA workstreams

2:40 – 2:55 | Workshop Framing Presentation: Expert perspective on emerging issues

- Overview of key emerging technical issues: Allan Miller Consulting Ltd

2:55 – 3:35 | Workshop Session One: Key issue and opportunity identification

- Facilitated round table workshops identifying the key issues and opportunities, problem statements and objectives, and overall roadmap scope and objectives
- Group Playback

3:35 – 3:45 | Afternoon Tea break

3:45 – 4:15 | Workshop Session Two: Implementation priorities, roles and responsibilities

- Facilitated round table workshops that builds on workshop one, considers the top priorities to include in the roadmap, and asks:
 - What are the key focus areas
 - What's our prioritisation criteria: what should be prioritised over the next two to three years
 - What are the key levers to consider for each (knowledge sharing, regulation, new guidance, education and training etc.)
 - What are the biggest implementation challenges
 - Where is greater national coordination required

4:15 – 4:30 | Group Playback and Closing Comments

4:30 | Close
