

EEA DSO Workshop

Slido Poll Results

Overview

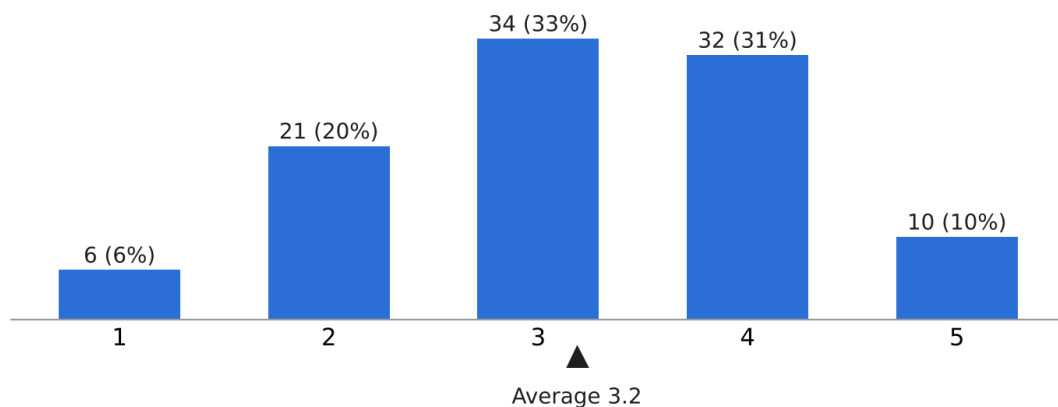

#	Question	Type	Responses
Q1	Having heard today's presentations, how confident are you that NZ is on the right path for DSO development? (1 = Low, 5 = High)	Rating 1–5	103
Q2	Which Roadmap workstream needs the greatest additional attention?	Single choice	94
Q3	Where could Electricity Authority action make the greatest difference over the next 2–3 years? (up to three)	Multiple choice	91
Q4	What is the single most important action to progress in the next 2 years?	Open text	91
Q5	What is the ONE thing we should not leave this workshop without acting on?	Open text	69

Responses = respondents for Q1–Q3, and number of answers for Q4–Q5. Joke and non-substantive answers (e.g. “Lunch”, “Coffee”) have been removed from the open-text results: 1 of 92 answers in Q4 and 8 of 77 in Q5.

Q1 Confidence that NZ is on the right path for DSO development

Confidence score averages 3.2 / 5

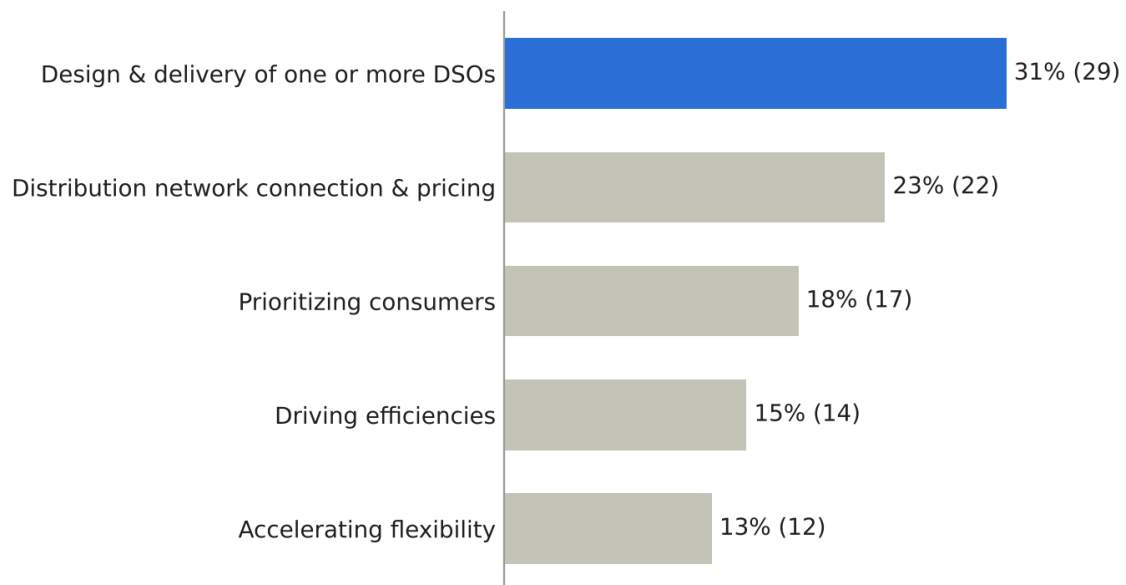

103 respondents · 1 = Low confidence, 5 = High confidence

Q2 Roadmap workstream needing the greatest additional attention

Q2 Greatest need: Design & delivery of one or more DSOs (31%)

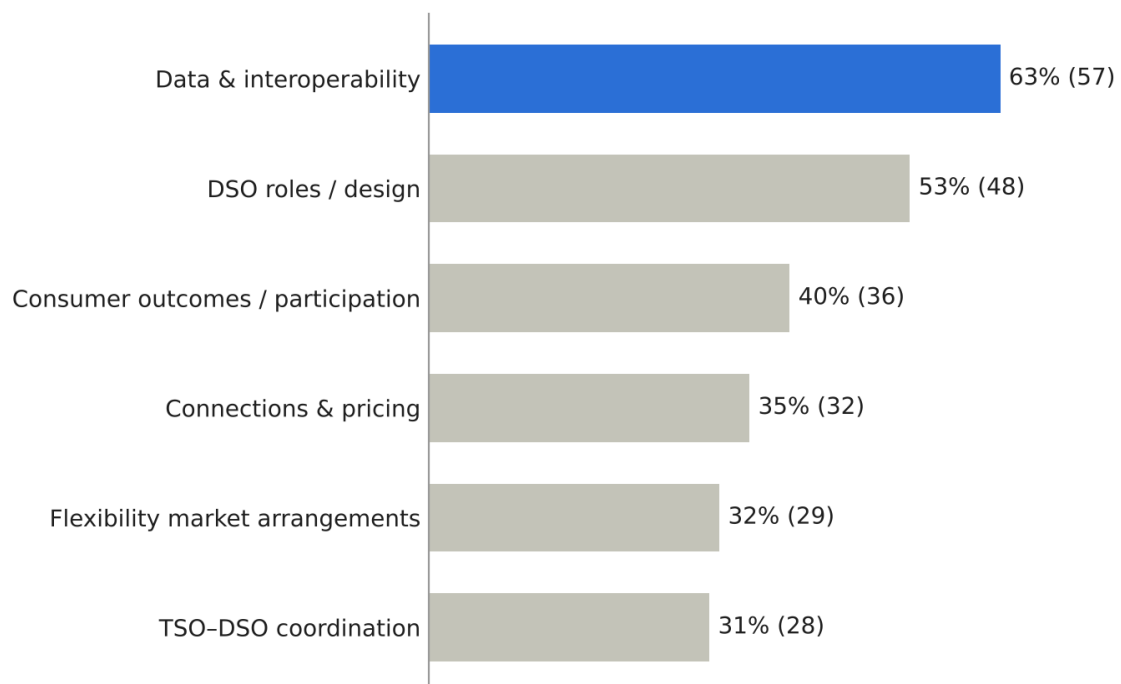

94 respondents · single choice · votes in brackets

Q3 Where Electricity Authority action could make the greatest difference

Q3 Greatest EA impact: Data & interoperability (63%)

91 respondents · up to 3 choices (230 selections) · % of respondents, so totals exceed 100%

Q4 Single most important action to progress in the next 2 years

91 answers. Network visibility was the most repeated answer. Responses are shown as submitted.

Repeated answers

Response	Count
Network visibility	5
Data sharing	3
Figure out how many DSOs you want and the operating model	2
Consumer engagement	2

Selection of other answers (each submitted once)

Response	Count
Create end state for industry to work towards without barriers	1
Assign roles and responsibilities	1
Direction of TSO - DSO model for NZ	1
Regulatory pathway(preferred model)	1
Enable visibility of the network in near real time down to LV level	1
Interoperability	1
Standardisation	1
Not end up with 28 different solutions	1
Flexible Connections	1
Defined market product for flexibility	1
Clear roadmap towards dynamic network pricing	1
Retailer pricing transparency	1
Get retailers on board	1
Customer Engagement and education	1
Coordinate our efforts	1

Q5 The one thing not to leave the workshop without acting on

69 answers from 67 respondents (some submitted more than one). Collaboration and Retailer participation were the most repeated answers. Responses are shown as submitted.

Repeated answers

Response	Count
Collaboration	3
Retailer participation	3
EDB collaboration	2
DSO roles	2

Selection of other answers (each submitted once)

Response	Count
Appoint a DSO leader!	1
Roles and responsibilities	1
Get the long term outcome sorted so we know what the end game is	1
EDB numbers vrs numbers of DSOs, we don't need 28 DSOs.	1
Deciding on a common goal	1
Forming a working group to bring all required parties together	1
Retailer engagement - they play a key role in DSO yet none are here.	1
Prioritising data standards - common datasets and lexicon across industry	1
Standardise TSO-DSO interfaces	1
Integration does not equal interoperability. Focus on that!	1
Defined flexibility product	1
Dynamic network tariffs (DNTs)	1
Enabling network visibility, especially LV	1
Fair smart meter data access/pricing	1
Consumer engagement and education	1
