# Incident Alert

**Incident Title:** Digger Roll Over

**Date of Incident:** Saturday, 6 April 2013

**Incident Description and Details:**

When unloading a digger from a low loader, the digger slid off the ramp and landed on its side. The operator received a cut to his head.

Work was immediately stopped; the injured employee was taken to receive medical attention, where 5 stitches were given.

Actions were then put in place to right the machine and proceed safely.

**Recommendations / Lessons:**

This incident is currently under investigation.
