

APEX Summit 2024

SWER Network Development Strategy

Marlborough Lines SWER

540 km
34x Networks

1960s – 1970s
Lifetime of 60 yrs

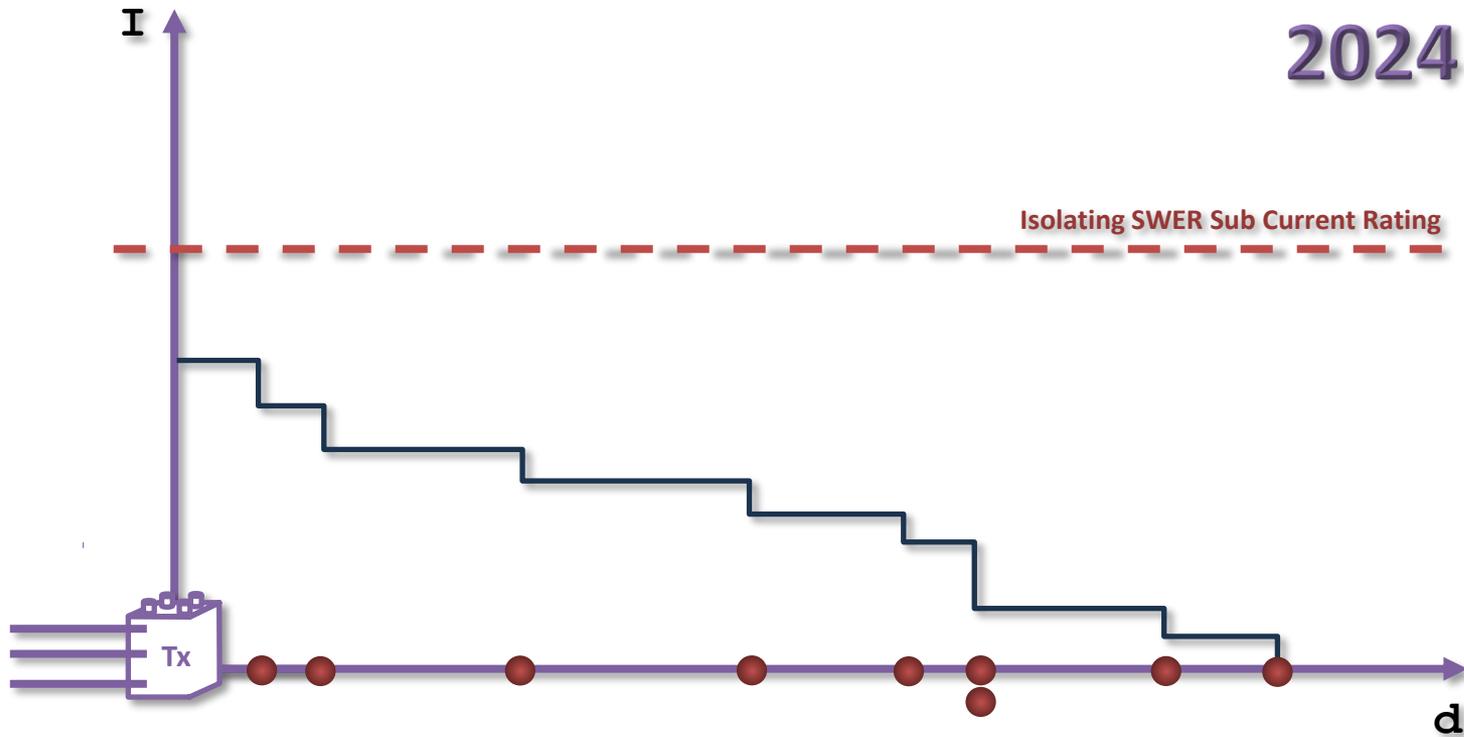

Single Conductor
Long Spans

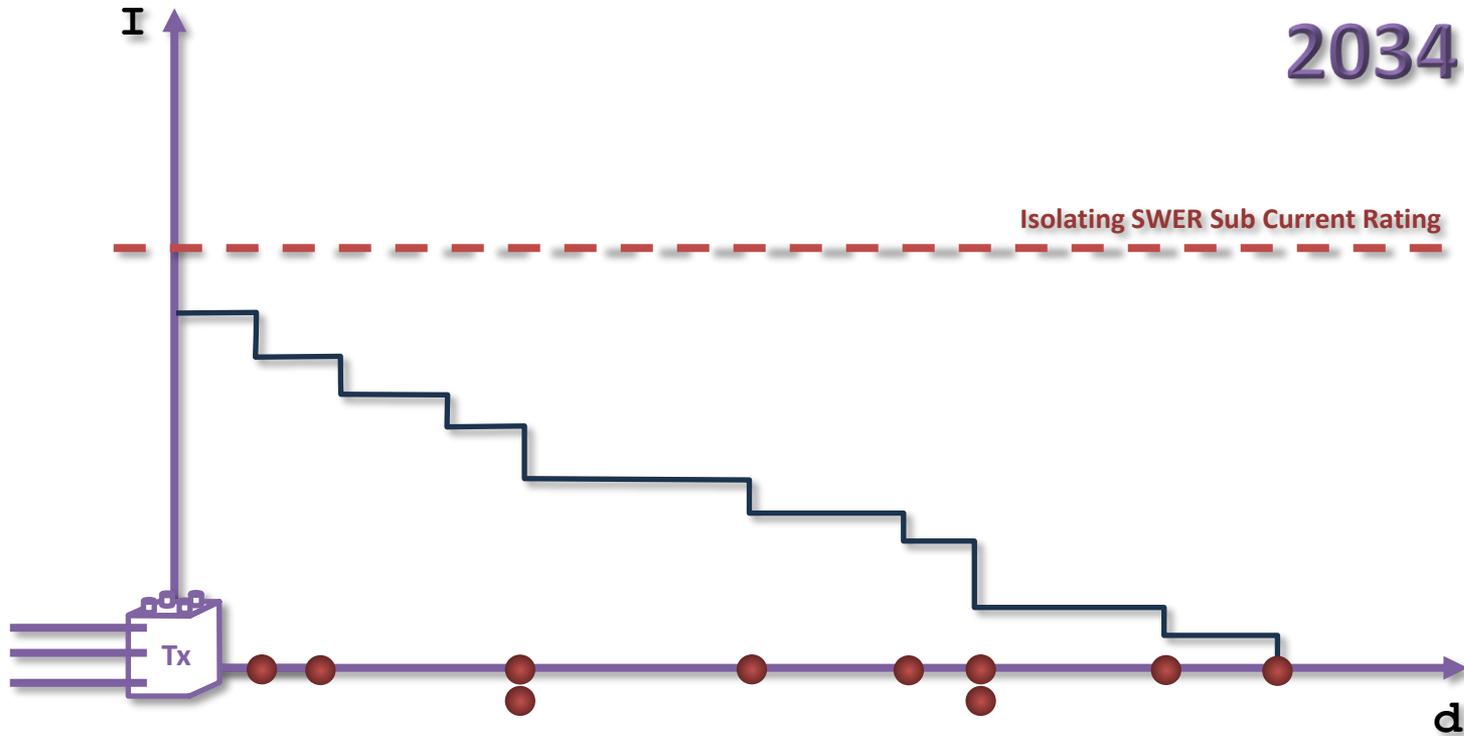

Earthing Problems
Low Capacity

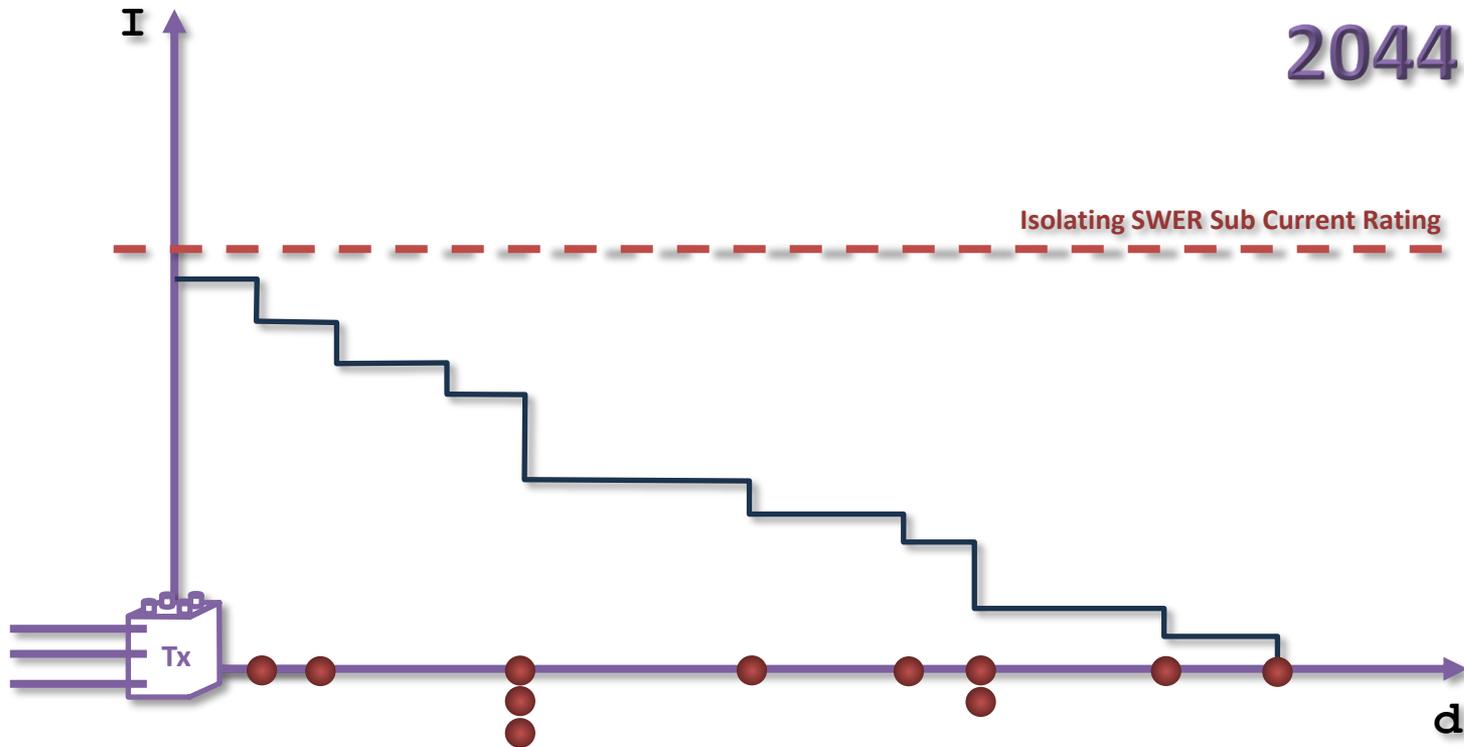

The Problem

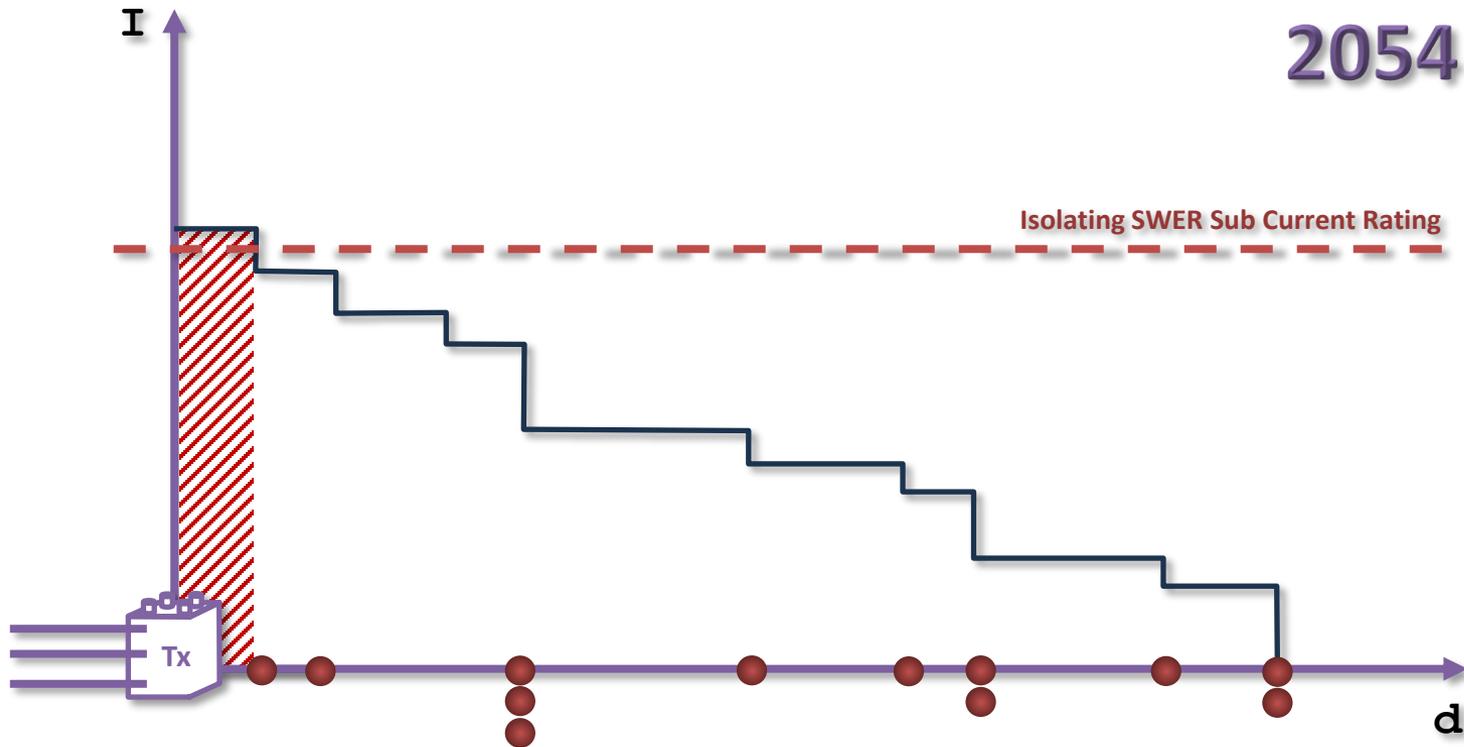

The Problem

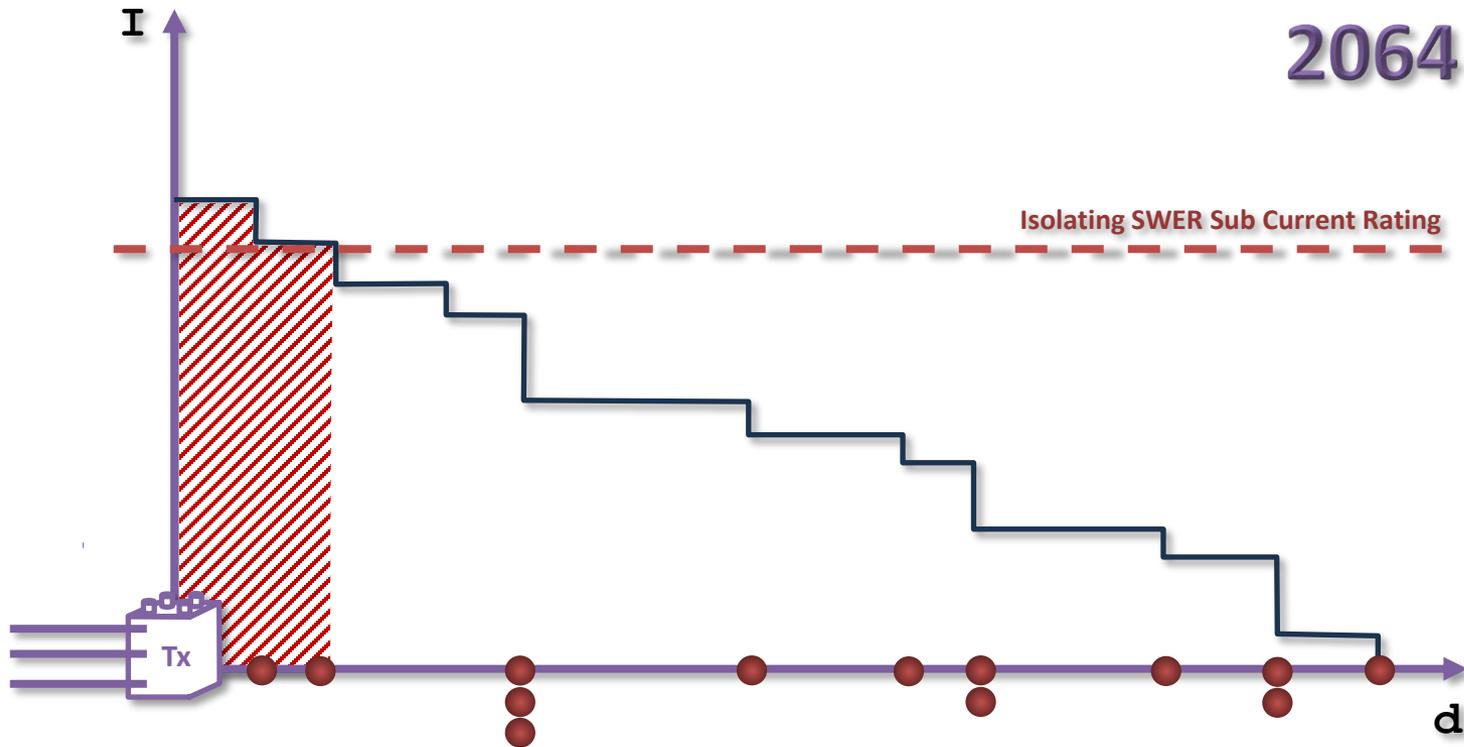

The Problem

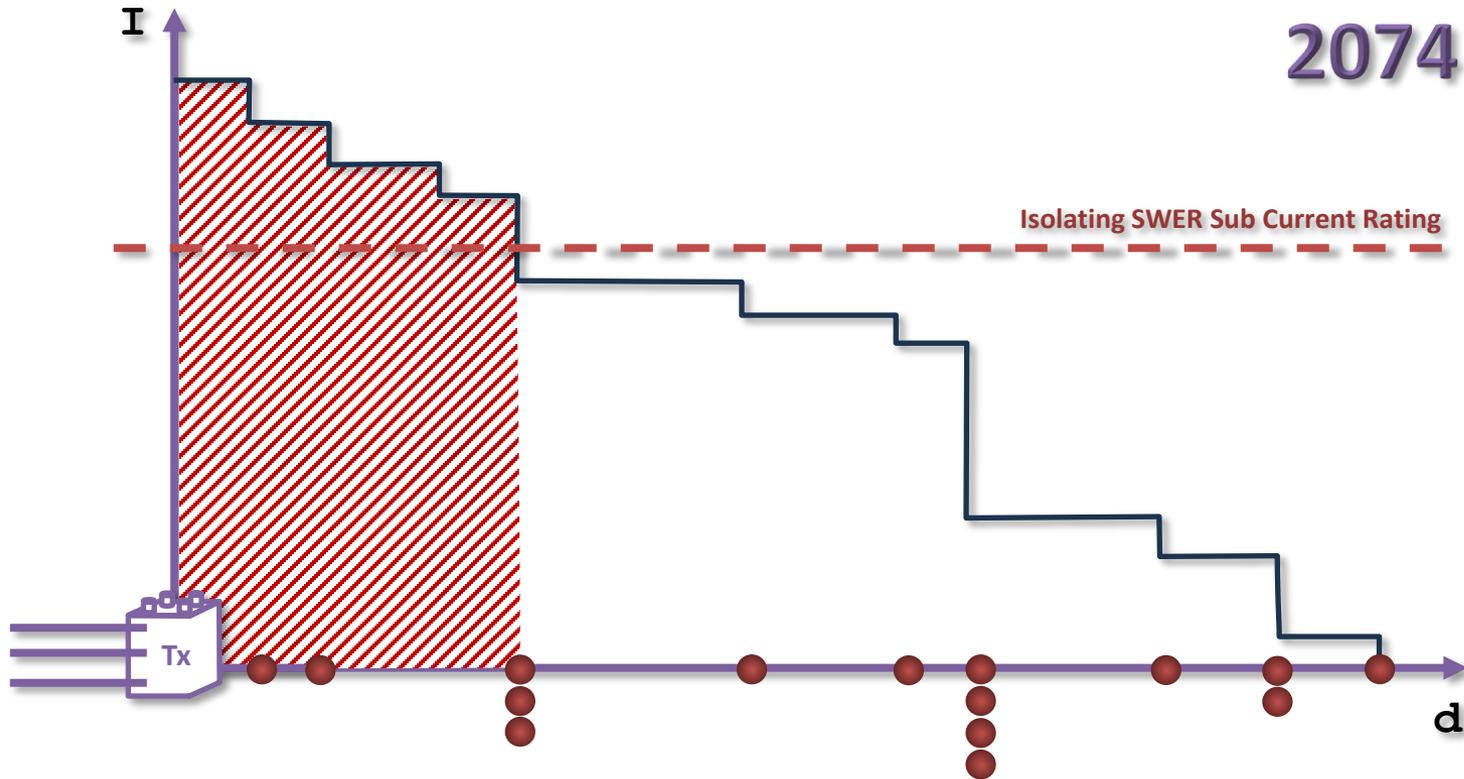

The Problem

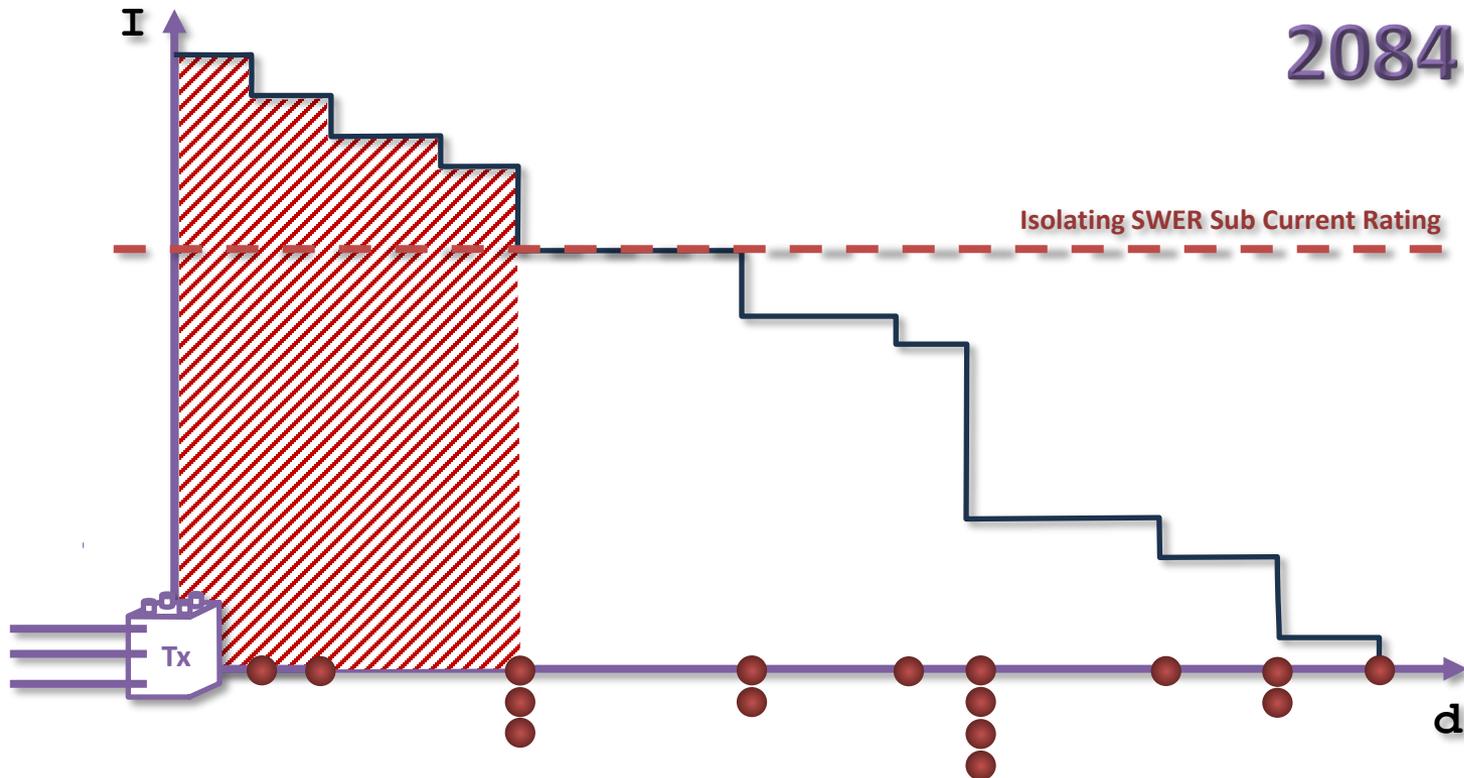

The Problem

The Problem

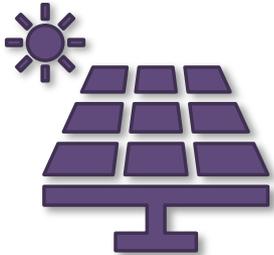

The Problem

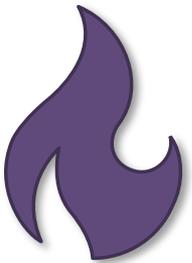

More Problems

Increase in EV fleet share
Charging during holiday weekends

Increase in distributed generation
Rarely on holiday homes

“We assume the phase out begins in 2030. We also assume that no further fossil gas connections to the grid, or bottled LPG connections, occur after 2025... to be on track for a complete transition away from using fossil gas in buildings by 2050”

pg 111 Climate Change Commission’s Report (2021)

Upgrade isolating transformer

Recommended Developments

Extend single phase

Extend three phase

Upgrade isolating transformer

Upgrade entire SWER network

Recommended Developments

Extend single phase

Extend three phase

Upgrade isolating transformer

Upgrade entire SWER network

Replace SWER poles as needed with stronger poles

Recommended Developments

Extend single phase

Extend three phase

Upgrade isolating transformer

Upgrade entire SWER network

Replace SWER poles as needed with stronger poles

Replacements to be like-for-like

Recommended Developments

Extend single phase

Extend three phase

Upgrade isolating transformer

Upgrade entire SWER network

Replace SWER poles as needed with stronger poles

Replacements to be like-for-like

Encourage removal of connections

Learnings

Collect lots of data!

Consider its significance

Think long-term
